Summary

Mobile Digital Water Quality Checker with pH Strip
Overview

Mobile digital water quality checkers that utilize pH strips combine the convenience of traditional pH test strips with the accuracy and digital capabilities of smartphones or portable devices. These systems are designed to make water quality testing more accessible, accurate, and user-friendly, especially for field or on-the-go applications.

Key Features

Feature	Description	Evidence
Portability	Devices are compact, handheld, or smartphone-based, allowing for easy field use	1 2 3
